PROFESSIONAL SUMMARY

Results-driven Full-Stack Django Developer with over 2 years of experience in designing, building, and deploying scalable web applications and RESTful APIs. Specializes in Python, Django REST Framework (DRF), PostgreSQL, and multi-tenant SaaS architectures. Proven track record of developing robust backend systems, optimizing database performance, and delivering secure, user-friendly solutions for the healthcare and e-commerce sectors.

TECHNICAL SKILLS

- **Backend Development:** Python, Django, Django REST Framework (DRF)
- **Frontend Development:** HTML5, CSS3, JavaScript, Bootstrap
- **Databases & Architecture:** PostgreSQL, Multi-Tenant Architecture (django-tenants), Schema Isolation
- **Tools & Technologies:** Git/GitHub, Docker, Redis, Celery, Linux, VS Code, AI Coding Tools
- **Core Competencies:** REST API Design, Background Task Processing, Database Modeling, Third-Party Integrations

PROFESSIONAL EXPERIENCE

Anjan Lab Company | Nepal **August 2024 - Present**

Django Developer

- Lead the backend development of secure, database-driven healthcare web applications using Django and Django REST Framework.
- Architect and implement multi-tenant SaaS structures using PostgreSQL and django-tenants, ensuring strict schema isolation and data security across multiple hospital networks.
- Build and maintain complex REST APIs for appointment management, patient workflows, and centralized clinical modules.
- Optimize database queries and implement asynchronous task processing using Redis and Celery to improve application response times and performance.
- Collaborate with cross-functional teams to refactor legacy codebases and streamline deployment workflows using Docker containerization.

Independent Web Developer | Nepal **May 2024 - August 2024**

Full-Stack Python Developer

- Designed and developed end-to-end web solutions for local businesses, focusing on backend logic, database management, and responsive frontend UI.
- Created custom dashboards and data analytics tools, improving client operational efficiency.

KEY PROJECTS

Star News TV - Digital News & Media Portal **Live: starnewstv.com.np**

- Engineered and deployed a live production digital news portal delivering breaking news & multimedia coverage across Nepal.
- Implemented high-concurrency content delivery, category filtering, full-text search, and automated publishing workflows.

Kinaun - Multi-Vendor E-Commerce Platform **Live: kinaun.com**

- Collaborated with cross-functional engineering team to build and launch an active multi-vendor shopping marketplace in Nepal.
- Engineered merchant seller center, product catalogs, order tracking workflows, and PostgreSQL relational schemas.

Bato Mechanic - Roadside Assistance Platform **Live: batomechanic.com**

- Engineered on-demand roadside assistance platform connecting stranded motorists with nearby certified mechanics.
- Built REST API endpoints for breakdown service requests, vehicle repair catalogs, and bilingual content workflows.

CDC Cinemas - Movie Ticketing & Theater Portal **Live: cdcnepal.com.np**

- Engineered multiplex cinema ticketing web platform with interactive seat selection & showtime scheduling.
- Built movie catalog management, dynamic ticket pricing tiers, and secure online transaction workflows.

EDUCATION

Bachelor in Computer Application (BCA) **Running (3rd Year)**

Prime College | Kathmandu, Nepal
